EXPERIENCE

PROJECT: Administrative Portal And Vendor Site   DECEMBER 2020 – TILL DATE

Client: Trice Systems Pvt Ltd, Hyderabad

Role and Company: Software Engineer, Trice Systems Pvt Ltd

Description: Built an e-commerce administrative portal for the top-line management to manage and control everything across the 3 different android and iOS apps (User, Vendor and Delivery Boy apps).

Responsibilities:

- Developed the entire **administrative portal from the scratch** using **ReactJS** and **Redux** concepts.
- Developed the User Interactive web pages in a professional manner using web technologies like **HTML5** and **CSS3** as per company's standards.
- Implemented design process upon client approval and built out all assets: buttons, products shots, UI components, etc and built **reusable** components.
- Created and deployed new features in order to sustain and amend existing applications.
- Designed **Styled Components** for re-usability.
- Designed multiple **UI's** (templates) for the website and discussed with team members before coming to a final conclusion.
- Created **React.JS** directives, factories and services for developing single page web applications.
- Implemented **React.JS** client-side form validation to validate the user inputs before passing to the back end.
- Responsible for **React UI** and architecture and building components library, including Tree, Slide View, and Table Grid.
- Designed dynamic client-side **JavaScript** codes to build web forms and simulate processes for web application, page navigation and form validation.
- Creating cross-browser compatible and standards-compliant **CSS** based page layouts.
- Migrated content from existing website to a new, database driven website; utilized in house Content management System.

Environment: HTML5, CSS3, ReactJS, JavaScript and Windows

PROJECT: HGN - Highest Good Network   MAY 2019 – DECEMBER 2020
